Subject: LLBG GW Monitoring

When: Wednesday, June 02, 2010 1:30 PM-3:00 PM (GMT-08:00) Pacific Time (US & Canada).

Where: Rm 29

This meeting is to discuss the regulatory approach for groundwater monitoring for the operating trenches.

Dib and Dave, please be prepared to present your perspective (with regulatory or technical justification) of what groundwater monitoring for the operating units (trench 31, 34 and 94) should look like.

We really need a final decision on this so that the permit writers can move forward with the development of Addendum D of the unit specific permits.
